

Mahatma Fule Arts Commerce & Sitaramji Chaudhary Science College Warud, Dist. Amravati

Department of Botany

Tour Report

On August 17, 2024, a tree plantation was organized by Botany Department in collaboration with the Range Forest Office, Warud. The tour commenced at 9:00 AM, with the students and faculty members gathering at the college premises. The destination for this environmental initiative was Rawala, a location approximately 12 kilometers from Warud, known for its scenic beauty and ecological significance. The main objective of the tour was to participate in a tree plantation drive, aimed at promoting environmental sustainability and awareness among students.

The tour was meticulously organized by the college's Department of Botany, under the leadership of Dr. Sanjay V. Satpute, the Head of the Department. He was accompanied by other faculty members, including Assistant Professor Mr. Shubham S. Sakhare, Miss. Ashwini Kedar, and Miss Kalyani Ande. Their dedication and efforts ensured the smooth execution of the event. From the Forest Department, Mr. Shinde was present to provide expertise and support for the plantation activities. His involvement underscored the importance of collaboration between educational institutions and government bodies in addressing environmental concerns.

Upon arrival at Rawala, the participants were greeted by the serene and green landscape, which set a perfect backdrop for the day's activities. The tree plantation drive began with an introductory session led by Mr. Shinde, who highlighted the significance of afforestation and the crucial role trees play in maintaining ecological balance, combating climate change, and supporting biodiversity. The participants, including students and faculty, eagerly engaged in the planting of saplings. Various species of trees, suitable for the local environment, were planted. This hands-on experience provided the students with practical knowledge about tree planting techniques and the care required for young saplings to grow into healthy trees.

The event was more than just a plantation drive; it was an educational experience that instilled a sense of responsibility towards nature in the young minds. The students learned about the importance of trees in providing oxygen, improving air quality, conserving water, preserving soil, and supporting wildlife. The collaborative effort also demonstrated the power of community action in environmental conservation. The enthusiasm and active participation of all involved ensured that the event was not only successful in terms of the number of trees planted but also in raising environmental awareness among the participants.

Upon successful completion of plantation drive students and staff member had their lunch at Nagthana , Then students were moved to enjoy the scenic beauty of Nagthana dam.

In conclusion, the tree plantation tour to Rawala was a resounding success, achieving its goals of enhancing the local environment and educating students about the importance of trees. The collaboration between Mahatma Fule Arts, Commerce, and Sitaramji Chaudhary Science College and the Forest Department was instrumental in making this initiative a success. Special

thanks are due to Dr. Sanjay V. Satpute, Mr. Shubham S. Sakhare, Miss. Ashwini Kedar, Miss Kalyani Ande, and Mr. Shinde for their commitment and contribution to the event. Their collective efforts have not only made a positive impact on the environment but have also inspired the next generation to take an active role in protecting our planet.

After successful completion of tree plantation programme all students and staff members reached safely to college campus
